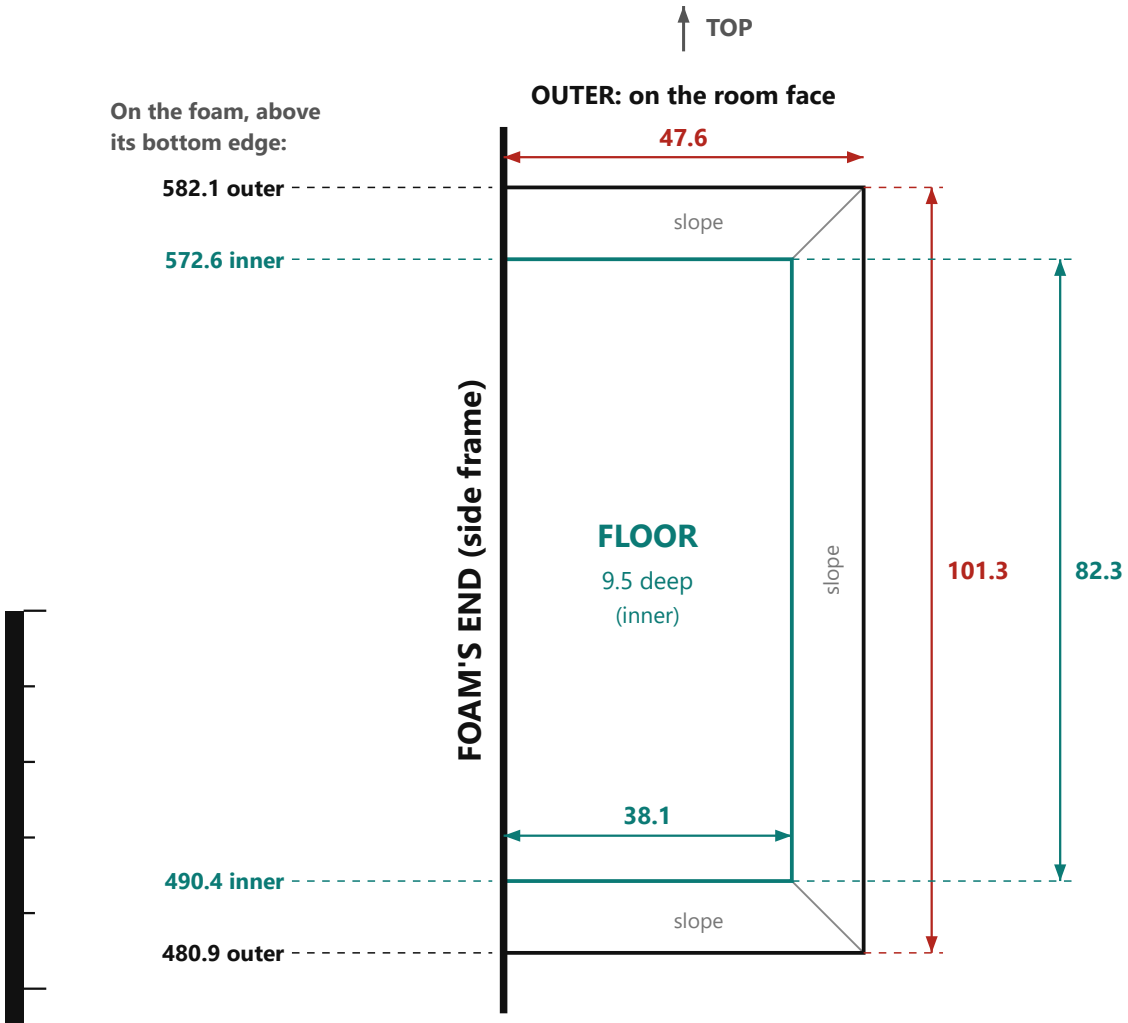
Window insert: latch cover notch template, full size (mm)

Print two copies at 100 % (Actual size, not Fit to page); both bars must measure 100 mm.
Copy 1: cut along the OUTER rectangle. Lay it on the foam's room face, its left edge on the foam's end (the side frame's end), and trace it: that is the top edge of the three 45° slopes.
Copy 2: cut along the INNER rectangle: the notch's floor, 9.5 mm deep. Lay it in the notch to check the floor.
Line both up in height with the notch in the assembled side cap; carve a little small, then sand to the cover.



The foam's bottom edge is below this page: TOP is up.

slopes: 45°, 9.5 wide on the face and 9.5 deep

100 mm

100 mm

tools/latch_template_svg.py (outer 47.6 x 101.3, inner 38.1 x 82.3, 9.5 deep)
